Office Action Summary	Application No. 10/715,352	Applicant(s) YONEDA, MASATO	
	Examiner Midys Rojas	Art Unit 2185	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings received on 11/29/03 have been accepted by the examiner.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1, it is unclear what is meant by “rule data”. A definition of this term has not been provided in the specification. It is also unclear what is meant by “and order of first processing significance degree” or “and order of second processing significance degree”, the examiner is interpreting these terms as an order of first or second priority. Finally, the phrase: “...memory blocks successively in an order from smaller (larger) second processing significance degrees...” is very unclear. Is the order from smaller or from larger processing significance?

Regarding Claims 2, 3, 5; 11, 12, and 16, it is unclear what range the range indication register is indicating.

The remaining claims (4, 6-10, 13-15, and 17-20) are rejected as having the same deficiencies as the claims that they depend from.

Additionally, the examiner would like to point out that the claims are generally indefinite and fail to conform to current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with idiomatic errors. As written, it is not clear what applicant is trying to claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Yanagawa (2002/0181263).

Regarding Claim 1, Yanagawa discloses a data retrieval device (CAM), comprising a rearrangement means for rearranging a first data group (“order of priority is reviewed, the entry data must be re-arranged”) including a plurality of rule data arranged in an order of a first processing significance degree (“entry data strings are stored within the memory cell array in accordance with their priority”), in an order of a second processing significance degree; and an assignment means for assigning a new second data group rearranged in an order of said second processing significance degree by the rearrangement means (“new data must be written in a prescribed address position within the entry data string in the memory cell array”), to a plurality of memory blocks successively in an order from smaller (larger) second processing significance degrees; wherein when storing data assigned by said assignment means to said memory blocks,

Art Unit: 2185

data assigned to said each memory block is furthermore rearranged in an order of said first processing significance degree by said rearrangement means and stored (Page 1, paragraph 0007).

Claim 1 was rejected as best understood by the examiner.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Midys Rojas whose telephone number is (571) 272-4207. The examiner can normally be reached on M-F 5:30am - 4:00pm.
